California Polytechnic, San Luis Obispo

JavaScript Full Stack Developer Coursework
Hack Reactor (2018)

// CERTIFICATIONS

Web Design
General Assembly (2015)

// TESTIMONIALS

Tim's keen insight, unwavering drive and organized approach is critical to building a consensus and moving projects forward to a successful deployment. His strong leadership skills and technical knowledge make Tim a key asset for any organization.

~Paul Monson, Assistant Property Supervisor, Wolfe & Associates

Tim makes a good project manager because he trusts the team enough to come up with their own decisions and arbitrates only when necessary, especially when the team is stuck in a dilemma or the goal of the project is not that clear.

~Joseph Baylon, Lead Software Engineer in Test, Glassdoor

satisfaction by creating a cloud sync utility that clients began implementing immediately after release.

- Reduced number of steps needed to upload photos in the Documents module 40%, greatly improving user experience, by implementing a major UI and UX upgrade in partnership with the team's UX designer.

VP of Product

Rock My World | 2013 – 2015

Designed, developed, and launched Android and iOS apps for firm's RockMyRun product. Directed a 4-member customer support team tasked with ensuring 100% resolution of tickets within 12 hours. Partnered with developers to build out and implement product backlog.

- Determined best-performing marketing promotion designs by analyzing Google Analytics A/B testing results.

Achievements:

- Decreased churn rate ~1% by redesigning the screens and user flow of the company's mobile app.

Product Manager

Commission Junction | 2008 – 2013

Promoted to facilitate the integration of Agile Software Development Methodology into the product implementation lifecycle. Created, implemented, and maintained a bug resolution process and a corporate communication process.

- Owned organization's publisher payment process, led Scrum meetings, and coached teams in continuous improvement best practices.

Achievements:

- Cut development man-hours 30% and saved \$150K per year by writing requirements for and directing the implementation of a new reporting system that transferred responsibility for report generation from developers to stakeholders.

Project Manager

Commission Junction | 2005 – 2008

Directed 3 agile software development teams totaling 15 employees. Led sprint meetings, groomed requirements to ensure they were development ready, and coordinated with QA and Systems to perform testing and release.

Achievements:

- Decreased workload by 12 days per month and sent millions of dollars' worth of payments out on time each month by documenting the company's monthly payment process and then standing up a team that repaired and fully automated it.
